Georgia SoftWorks sought photographs and video clips (media) of work environments such as warehouse management and logistics where the GSW Telnet Server for Windows UTS software is installed.

Pictures depicting the use of GSW UTS in client operations, devices, warehouse work and logistics were reviewed by select GSW staff. Staff were impressed with photos of the implementation of GSW UTS platform at TT-Trgotehna, submitted by Zoran Ivkovic of Informatio d.o.o., an authorized reseller of the Georgia SoftWorks Telnet and SSH Server for Windows.

TT-Trgotehna has implemented their own application solution coupled with hardware (PCs, wireless mobile computers, touch screen computers, etc.) which uses the GSW UTS as a platform. Solutions provided cover the complete needs of this company, such as accountant-financial services, sales, service, warehouse-inventory, time attendance, to highlight a few. The GSW Telnet Server and SSH Server for Windows is excellent with mobile devices, RF terminals, bar code scanners and other data collection devices in wireless environments. Additionally, the RF wireless hand held application developer is able to create more generalized applications that will easily work with a variety of manufactures' hardware making it an excellent complement to the solutions utilized by TT_Trgotehna as offered by Informatio d.o.o.

"We have been cooperating with company Georgia Softworks for almost a decade. Unsurpassed speed and stability of GSW UTS platform as well as outstanding level of support convinced us years ago to start developing our own solutions around GSW UTS platform," said Zoran Ivkovic of Informatio d.o.o. "We are proud that based on this collaboration we can offer our customers as complete as possible range of solutions."

Established in 1991, Georgia SoftWorks is a privately held software development company recognized for creating high performance data communications, system and telecommunications applications. Georgia SoftWorks has obtained a worldwide presence with its industrial SSH/Telnet Server for Microsoft Windows. GSW's long-term commitment to SSH/Telnet has led to the pioneering of major features such as Session Shadowing, Session Monitoring, Graceful Termination, Automatic Logon, Logon Scripting and more recently Team Services technology which allows mobile device users to transfer, swap, share and recover mobile device sessions. Georgia SoftWorks also leads in SSH security by providing Digital Certificate Authentication with a Many-to-one and one-to-one mapping tools, opening up a new level of security to administrators.
