With recent bandwidth and software upgrades, Georgia SoftWorks webinars for the [GSW Telnet Server for Windows](#) and [SSH Server for Windows](#) are crisp, clear and distinctly more personal.

Experienced Georgia SoftWorks technical support staff are able to customize a webinar covering topics ranging from products and features, to Sales and Training. "The great news is that there are no restrictions on number of participants or time zones. GSW webinars are available for one or many and can be configured to work with your schedule," said Diane Sexton of Georgia SoftWorks. "With the new technology upgrades you can see and dialog with the webinar presenter providing a distinctly more personal experience."

The Georgia SoftWorks Universal Terminal Server is the core server software module that provides the reliability, consistency, robustness and powerful features that has distinguished GSW Server products. Georgia SoftWorks has pioneered many features for the [Telnet Server](#) and [SSH Server for Windows](#). One example is Team Services. "Team Services allows team members to Share a Session, Transfer a session to another device, swap devices but keep the same session and recover a session from a failed device all in under 60 seconds," said Brian Butler of Georgia SoftWorks. This is just one of many features where GSW will be able to provide instruction via GSW webinars.

Established in 1991, [Georgia SoftWorks](#) is a privately held software development company recognized for creating high performance data communications, system and telecommunications applications. Georgia SoftWorks has obtained a worldwide presence with its industrial SSH/Telnet Server for Microsoft Windows. GSW's long-term commitment to SSH/Telnet has led to the pioneering of major features such as Session Shadowing, Session Monitoring, Graceful Termination, Automatic Logon, Logon Scripting and more recently Team Services technology which allows mobile device users to transfer, swap, share and recover mobile device sessions. Georgia SoftWorks also leads in SSH security by providing Digital Certificate Authentication with a Many-to-one and one-to-one mapping tools, opening up a new level of security to administrators.
